

PhD opportunity

PhD: Assessment of payment for environmental services as a means of funding resilience [1]

Supervisors:

Prof Bob Costanza and Prof Jeremy Russell-Smith, Charles Darwin University

A key factor in any long term improvement in resilience in remote north Australian communities will be considerations of cost. The low levels of infrastructure and remoteness of communities ensures that service delivery is difficult and expensive. The ecosystem services project will examine mechanisms for generating income and attendant human capital while managing elements of landscape BNH risk.
