**Supervisors:** **Professor Kevin Ronan**, School of Human, Health, and Social Sciences, CQUniversity  
**Dr. Briony Towers**, Geospatial & Mathematical Sciences, RMIT  
**Dr. JC Gaillard**, Faculty of Science, University of Auckland

This PhD Project involves a **cross-cultural** study on **disaster resilience education** for children within the framework of a **participatory action research** paradigm aligning with a **child-centred disaster risk reduction (CC-DRR)** ethos.

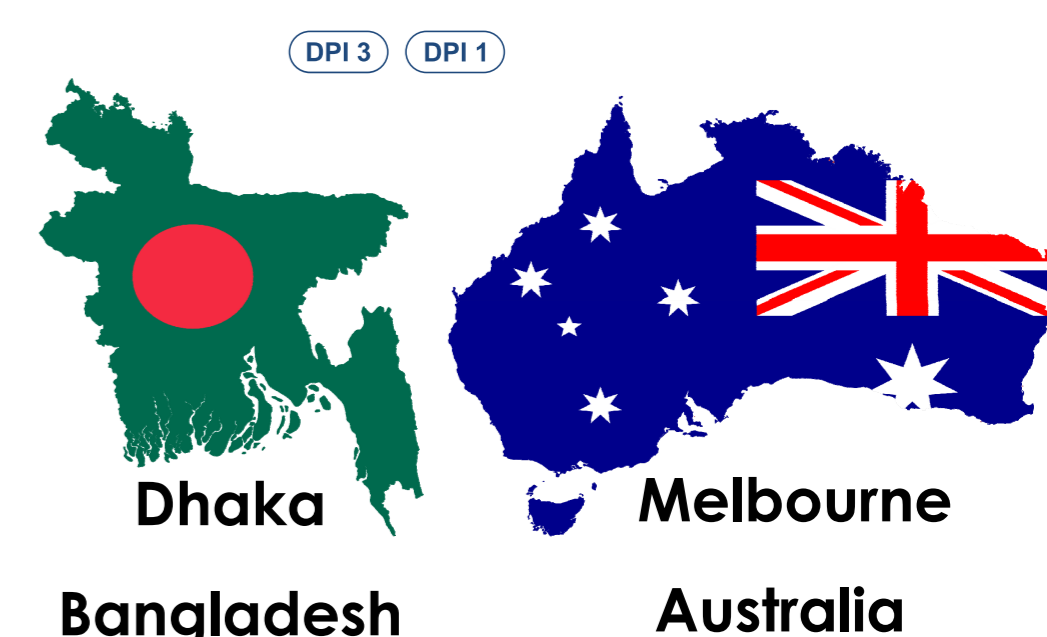

To **develop** and **test** a **teacher-delivered, child participatory disaster resilience education program** for children by using **bottom-up** and **top-down** design strategies.

- The **structures, components and implementation process** of current CC-DRR programs
- Finding which **specific program component** responsible in generating what specific **effective outcome**
- **Bottom-up** and **top-down** design strategy
- **scaled up** and **sustainable implementation**

## Participants

- ▶ Children (9 -12 year old)
- ▶ School teachers
- ▶ Parents
- ▶ Community members
- ▶ Government officials
- ▶ Representatives from CC-DRR implementing agencies
- ▶ End user rep. of the larger CC-DRR program of research
